

# BIG SALLY NEWS.

Aut inveniam viam, aut faciam.

VOL. III. NO. 10.

LOUISA, LAWRENCE CO., KY., OCTOBER 27, 1887.

M. F. CONLEY, Publisher.

## CURRENT TOPICS.

Chicago has 30,034 street-lamps. The Persian language is taught at Cornell University.

Some of the extra large cultivated chestnuts cost \$5 a bushel.

Artificial ivory is made by injecting whitened with chloride of lime.

The average price of new corn throughout Kansas is forty cents per bushel.

In Audrain county, Mo., there is a baseball club composed of nine brothers.

A Hindoo might readily worship the Western locomotive; it is so like Juggernaut.

The koyo tree, from which the Japanese paper is made, is rapidly becoming extinct.

A society in Detroit of men sworn not to swear numbers nearly 1,000 persons; it is said.

An Atlantic City (N. J.) divine recently delivered a sermon to an audience of one.

An Omaha bride, en route to the altar, split her satin corsage by an ill-timed sneeze.

As automatic pencil that writes blue, red, violet and black at command is a late novelty.

Edison's talking machine, the phonograph, has been perfected and will be put on the market.

The bill in the Mexican Congress permitting re-election to the President has been finally passed.

In this country 45,000 insane persons are supported by public taxation, amounting to \$5,000,000 annually.

There are twenty-one bureaus of labor in the United States. Four years ago there were only seven.

At a point in a deep ravine, two miles from Wallingford, N. Y., ice, it is said, forms the year around.

There are only two public libraries in San Francisco—one of President Garfield, the other of General Halleck.

The wood-chopper's axe is said to be rapidly stripping New Hampshire of its most beautiful scenery.

Proctor H. C. of Petersburg, W. Va., has married a widow with thirty-one children. She is his eighth wife.

This school slate manufacturer has formed a pool and will put up prices, thus putting another tax on education.

A movement for government control of the telegraph is already taking shape in the work of the Fifteenth Congress.

An uptown fancy store in New York has on private exhibition one of the diamonds worn by the Empress Eugenie.

Profronk physician of Dubuque thinks the turned-down lower lip is the prime and common cause of diphtheria.

A female member of the Coldwater (Mich.) Salvation Army has worked on her jersey jacket the words, "No water in hell."

The word "hoodie" has gone into the U. S. language. Eastern newspapers, even those of Boston, use it without quotation marks.

It is asserted that ninety out of every hundred male children born in Ireland at present are named after Charles Stuart Parnell.

Seven U. S. Senators spent the summer in Europe. They were Palmer, Stockbridge, Hale, Frye, Spooner, Aldrich and Hawley.

Henry A. Robinson, a famous dealer in sporting goods, says that Mexico buys more pistols than all the United States put together.

An official list just published shows there are thirty-five widows of revolutionary soldiers still drawing pensions from the Government.

One of the glaciers of the Kinchinjunga in India—a peak whose summit is 28,000 feet above sea level—has a vertical height of 14,000 feet.

Mrs. Frances E. Willard wants all temperance women in the world to observe November 12 as "day of special prayer for the cause."

Howard Perry, one of the assistants to Mr. Cleveland in the Department of Justice at Washington, has just come into possession of a large fortune.

A MINNEAPOLIS woman was fined \$10 for breaking her umbrella over the head of a street masher, but the public sent her over \$200 to pay the fine with.

The danger to peasants in Russia is increased by the fact that the peasants shoot at them as they come down, supposing them to be evil spirits.

The Michigan maiden who chased a robber with a pitchfork and made him rob her booty, is said to be receiving an average of fifteen offers of marriage per week.

The Bankers' Convention, recently held in Pittsburgh, earnestly urged the extension of the extradition treaty with Great Britain so as to cover embezzlers and defrauders.

The name of a new explosive with the business claim to have been "inventor." Its peculiarity is that its force does not strike upward or downward, but forward.

Frost all around and snow in New England the other night warn the country to get their heavy clothing and be in readiness for the time when the blizzards begin business.

Judge PARSONS, of the supreme court of Pennsylvania, said, in a late decision, that a man who can not or does not read the newspapers is not properly qualified to serve as a juror.

Mrs. LOUISA TURNBULL, of Washington, claims that her father was a brother of William O'Brien, the late California bonanza king. Of his estate \$3,000,000 is in doubt and she will claim it.

LIEUTENANT WILLIAM H. SCHUTZKE's report of his mission to the Lena Delta, records 95.8 degrees below zero, the temperature he experienced at Verkhoyansk, Northern Siberia, as the lowest ever observed.

A JOURNAL devoted to zoography, a science by which it is undertaken to determine a person's character by the size and shape of his nose, is soon to be published. It is announced from Paris is credible.

The Indian Prince Wahajah Sir Wahjah ordered \$250,000 worth of goods in New York recently. He made his purchases in this country instead of his natural market, England, because he thinks the goods of this country superior to those of England.

An extradition of the Omaha World, printed on white satin, was presented to Mrs. Cleveland on her visit to that city. This "extra" was largely devoted to "a description of Mrs. Folsom's property in Omaha, in which her daughter, Mrs. Cleveland, is interested." It illustrated pictures of the stores, corner lots, etc.

## TROUBLE EXPECTED

In Case "Blinky" Morgan Be Convicted of Murder.

An influx of Criminals Who are Suspected of Planning a Rescue—Extra Guards Needed.

RAVENNA, O., Oct. 23.—The now all-absorbing topic of conversation in official circles, in the household, in the shop and on the street corners, "Blinky" Morgan, the recognized murderer, highwayman, robber, thief and general desperado. Ever since the arrival on Thursday of the two score of witnesses who will testify in his behalf by attempting to prove an alibi the officials in charge of "Blinky" have been more cautious. His adeptness in breaking jail is well known. The first precaution taken was the handcuffing of him right at his seat in the courtroom before leaving court, instead of going to an ante-room, as has been the custom. But the question has arisen would these precautions already taken be of any benefit in event of an attempted rescue. Many men are here presumably out of curiosity to see "Blinky" and hear the trial, but it is a fact and commonly known that some of "Blinky's" best friends and brothers in crime are on hand. Mrs. Nell Lowrie, the relative of Morgan by marriage and sister of Connelin, now in jail waiting to be tried for complicity in the same murder for which "Blinky" is being tried, has been entirely too familiar with "Blinky" since her arrival. Her falling on "Blinky's" neck and kissing him passionately has been much talked about, and it is understood that Sheriff Sheldon will hereafter allow no familiarity whatever and keep all at a safe distance. "Blinky" reads the daily newspaper regularly. One of the guards referred to an article in one of them in which it said that hemp was starting him in the face. "Never will a rope be stretched around my neck," he has been heard to say. "I am not afraid of a rope. I am afraid of a safe distance."

"Blinky" reads the daily newspaper regularly. One of the guards referred to an article in one of them in which it said that hemp was starting him in the face. "Never will a rope be stretched around my neck," he has been heard to say. "I am not afraid of a rope. I am afraid of a safe distance."

THURSDAY, OCTOBER 27th, 1887.

John L. Sullivan, the greatest prize-fighter who ever lived, sailed for England to-day.

A French steamer arrived at New York last week having on board four cases of cholera.

One of the handsomest blocks in Pittsburg was wrecked by a natural gas explosion in that city last week.

The Colored State Normal School was dedicated at Frankfort last Saturday, the Governor participating.

A daughter of Senator Joe Blackburn was married last week at Versailles to J. Tweed Stewart, of Cincinnati.

The general Association of Kentucky Baptists held a celebration in Louisville last Thursday and Friday.

Miss Josie Holmes, of Cincinnati, Fidelity bank notoriety, has been arrested and placed in jail. There are twenty-one indictments against her.

Dispatches from Montana state that trouble is expected soon with the Crow Indians. There is, however, an abundant force of troops there to subdue them.

The United States grand jury has found seventy indictments against E. L. Harper, and quite a number against the other officials of the Fidelity bank at Cincinnati.

The Virginia Democrats have been more lively hopes of success than formerly, as the Republicans of what is known as the "black belt" are deserting Mahone.

The Masonic Grand Lodge of Kentucky was in session at Louisville last week. J. Solie Smith, of Lexington, was elected Grand Master and J. D. Black, Deputy Grand Master.

The Georgia Legislature, after a session of four months, has adjourned without accomplishing anything of importance. Many important public measures were discussed, but not one was adopted.

Gov. Buckner has pardoned D. D. Patterson, a member of the State Guard who deserted while the troops were in Rowan county, and who was afterward tried by Court Martial and sentenced to the county jail for ninety days.

The manuscript of the original Ordinance of secession issued by the State of Virginia has been sold by Mr. Charles Bullis, of Worthington, Minn., in whose possession it was, to Mr. George H. Treadwell, of the G. A. R. for \$1,000.

Mrs. Annie Lachs, who threw a pan-cake at Mrs. Cleveland while the presidential party was in the fair grounds at St. Louis, was last week fined \$50 in the Police Court of that city for the act, which the defendant claimed was a bit of pleasantry.

President Cleveland and party encountered their first wet and disagreeable day at Atlanta. The stop at Montgomery on Thursday was the last made by the party. They reached Washington Saturday, and were very glad to get home, although they are delighted with the trip.

The new silver vault of the Treasury Department will be completed early in November. It will have a capacity of 150,000,000 silver dollars, and the statement is made that there is nearly enough silver now seeking storage to fill it. The vault has been constructed at a cost of \$80,000.

The Railroad outlook for the Sandy Valley is very bright at present. Elsewhere in this issue will be found two railroad articles of interest to our people—especially citizens of Louisa and the Tug region. The enterprises, to be carried through, need only a reasonable amount of substantial encouragement, and we hope our people will grant this without any hesitancy. Do not allow this opportunity to pass unimproved.

The United States Supreme Court is about to make a decision upon the question of the responsibility of bank directors for losses incurred through absconding and dishonest officers. If the court decides that they can not be held liable, the primitive sock will be almost as safe a place of deposit as a bank.

David Roberts, aged about seventy years, has been convicted of murder in Morgan county, and sentenced to the penitentiary for life. In October, 1864, he killed J. L. Kendall, of West Liberty, was arrested, escaped and went West, where he became a prominent citizen. A son of Kendall a short time since learned of the whereabouts of Roberts, and procuring a requisition, brought him back.

### Mr. Thurman's Speech.

Hon. Allen G. Thurman, one of our greatest Statesmen, made one of the greatest speeches of his life at Kenton, Hardin county, Ohio, last Saturday. He said that it was probably the last political speech he would ever make, and at least 10,000 people were out to hear him. In the course of his remarks on Grover Cleveland he said: "On my honor as a man who is bound to tell the truth, if ever a man is bound to tell the truth to his fellow-men, I don't believe that a more honest, braver, truer man ever filled the Presidential chair of the United States."

### Prospective Railroad up Tug River.

Messrs. W. H. Gurley, T. D. Dale and Col. R. L. Nye, of Marietta, O., who have held valuable lands in Logan County, W. Va., for ten or fifteen years past, spent two days in Louisa and Cassville the first of the week, in furtherance of their plans for the construction of a Railroad up the Tug Fork, which have been developing for some time past.

These gentlemen are well and favorably known in this region, and their connection with a scheme so important as this to the interests of the Sandy Valley, will recommend the enterprise to all, and especially to the land-owners along the river, to whom it is of vital consequence.

In order to secure the success of the enterprise, indeed before it can make any progress, all necessary rights of way along the line must be secured, and donations of mineral interests in a large body of lands, sufficient to furnish a good basis for the securities of the road. Mr. Gurley will remain in the valley for some time, to receive agreements of this character, and upon the response made to his applications will depend, not merely the ultimate success, but the commencement of the work of constructing the road. These gentlemen and their associates have had considerable experience in railroad enterprises. They do not desire to hold out promises which cannot be fulfilled, but they have the best assurances from eastern capitalists that if the people of the valley will do their part, they can have the road.

The agreements asked for are wholly contingent upon the completion of the work, so that if the road is not built, no one is injured. Mr. Dale went directly to New York, Col. Nye, who is the Attorney of the company, returning to Marietta.

### National Free Soil Party.

Preliminary arrangements are reported to have been made in St. Louis for the holding in that city, about December 16, a conference of all political labor elements, with a view to their consolidation into a single political body, for which the name of National Free Soil Party has been suggested. It is expected that Henry George will be a prominent figure at the conference, and that his land theories will be adopted.—Courier Journal.

### KENTUCKY.

One half of the area of Kentucky is covered with forests of valuable timber, including oak of several species, ash, yellow poplar, black walnut, hickory, lynn, beech, chestnut, red cedar, etc. Of the fertility of its soil it is needless to speak, for the fame of that, especially of its bluegrass, has extended over the world. It is here that the finest horses in America are raised—the live stock in the State, counting horses, mules, cows, etc., being valued at over \$70,000,000, while the annual value of its agricultural products averages about \$75,000,000.—Baltimore Manufacturers Record.

### The Fiftieth Congress.

[Chicago Tribune (Rep.)]

If the Fiftieth Congress has average political sense it will not disregard the significant notice served upon it by the organized labor of the country in convention assembled at Minneapolis. If the members of Congress decide to retain the present war tariff let them be frank enough to admit that they do so on demand of the mill bosses, and not at the request of the workmen. The trades-union classes have deliberately arrived at the conclusion that a high war tariff harms them more than it benefits them; that any actual increase of wages that it causes is more than lost in the extra cost of living which results from it; and that it cripples the farmers and disables their power to buy manufactured goods. Before another national convention of Knights will meet the presidential conflict of 1888 will be under way. Neither of the two great parties seem likely to have any hesitation in the choice of a standard-bearer, but it must be remembered that the standard itself is of no small importance, especially that part of it which will define the position of the party on a question largely decisive of the cost of living. The politicians of the country will hardly fail to take note of the fact that the Knights of labor are not fooled by the hypocritical pretention that a high tariff is in their especial interest. The seed sown at Minneapolis may not bring forth a congressional harvest, but it is morally certain that it will prove a sort of winter wheat, germinating next spring and bringing forth "seed after its kind" at the polls next fall.

The Owen News says: "Gov. Buckner, we think, will make one of the best Governors the State has had for years, and when his time of office shall have about expired we should not wonder if the people will not again call him to the front. We believe every Act during his term will be carefully weighed, and that he will not be influenced by any of the moth-eaten politicians who generally infest the Capital, seeking to give advice and create themselves a part of the executive power, lobbying in the interest of friends and measures, and generally interfering with a good, just and impartial administration of affairs."

No better evidence of Mr. Cleveland's ability is needed than is found in his prominence and strength with the people to-day. The most timorous of his friends in the outset, were wont to look at Mr. Bayard for help in time of apprehended need as the President advanced with his administration. To-day Mr. Cleveland is pre-eminent, conspicuous, and beside whom Mr. Bayard is very subordinatedly considered. It is very evident that Mr. Cleveland was the possessor of a vast amount of latent power for which he was not credited, but which has developed in a manner no less positive than surprising. No public man in America commands more respect for administrative ability and statesmanship than does President Cleveland.—Frankfort Capital.

The people of Kentucky do not appreciate what their newspapers do for them. A well known man of this city, lately deceased, was once very forcibly reminded of it. When Dr. Standford was President of the Louisville and Nashville railroad, one of the annual meetings was held in New York city. He concluded that he would like to have the report printed in the New York papers, especially the Herald. He sent a message to the Herald office, notifying them that the meeting was to be held, and to send a reporter around for the annual report of the system. The reporter was sent, and the next morning the Doctor procured a copy of the Herald. There was a full account of the business done by the road and its condition.

"The Herald is a great paper," said the Doctor to his private secretary. "Doesn't that report look well in it? We had better buy a few hundred copies and send them to Kentucky."

A few hours later, amid a lot of other mail for the railroad President, was an envelope with the Herald stamp on it. "I suppose they are going to thank us for that good item we gave them exclusively," he remarked as he broke it open. He pulled out a Herald bill-head, on which was the simple statement: "The Louisville and Nashville Railroad Company, debtor, to the New York Herald for advertising, \$700." He protested, but he had to pay the bill, and he had no more annual reports printed in the New York papers.—Courier-Journal.

### Railroad Prospects.

#### Probability of a Connection at Louisa with the Chattahoo.

[Ironton Register.]

Our correspondent whom we quoted last week, and whose communication was read with much interest by all people who think and speculate on and hope for the prosperity of this region, writes us again and deals with most interesting information. He says:

"Some six or eight years ago, Mr. E. W. Clark and other Philadelphia gentlemen of wealth, went into the Flat Top Mountain region of Virginia, in Tazewell county, and made extensive purchases of coking coal lands, and offered such inducements to the Norfolk and Western R. R. in the way of freights, as caused that company to build its New River branch to Pocahontas. Immediately the new field was developed, large mines were opened and hundreds of coke ovens were constructed and set to work, until today the daily output is 6,000 tons, most of which is coked right there and shipped East and South. Finding this venture successful, this land company began the acquisition of more territory, for the most part lying west of the watershed, and today they are the owners of over 300,000 acres of the finest coal lands in Mercer, McDowell, Wyoming, Raleigh, Boone and Logan counties, W. Va., and Tazewell Co., Va., reaching as far west as Pineville, on Guyandotte river, and nearly to the mouth of Elkhorn, on Tug river. The coal vein on the eastern side of the mountain is ten feet in thickness, but is reckoned to a little over seven feet on Elkhorn fork of Tug and Pinnacle fork of Guyan, the two principal streams west of the ridge. It is of an excellent quality, easily mined and makes splendid coke. In order to induce the railroad company to construct its line into this new territory of the land syndicate, the latter bound itself to construct 350 coke ovens on Elkhorn, and Mr. S. A. Crozier, of New York, who has 40,000 acres on the same creek, is also under bond to put up 200 coke ovens. This new extension of the N. & W. is now well under way; the tunnel heading is completed and part of the grade on Elkhorn is ready for the rails. Within six months, six mining operations on Elkhorn will be putting out 1000 tons of coal per day, a handsome addition to the freight of the N. & W., and 550 coke ovens will be in full blast. By the time these are at work, it is probable that the line will have been put under construction onto the waters of Guyan, on Pinnacle creek, where still more extensive operations are projected. On this creek, the land company owns very nearly everything, and have the finest body of coking coal yet discovered. The creek is twenty-five miles long, and one can stand at the head spring and see its junction with Guyan river, so nearly does it flow in a straight line. (The map doesn't show it this way, but it is a fact nevertheless.) How Pinnacle creek will be reached is not at all certain at this time. If the coke is to have a western market, a thing the land company now desires above everything else, the extension will probably be brought from Elkhorn, but if the product of these mines is to be shipped East and South exclusively, as heretofore, it is likely the railroad will reach Pinnacle by leaving the N. & W. at Crane creek, 12 miles below Pocahontas, and striking Pinnacle at the very head on the coking coal vein. If this is done, it will give a second tunnel through the Flat Top Mountain; but as the vein of coal upon which the tunnel is driven is large and regular and has a good roof, the expense of tunneling is reduced to the minimum. As above stated, the company owning and operating this large body of coal are very anxious for a western outlet. They have proposed to the Norfolk & Western to guarantee a certain tonnage in case that company will give them the desired line, but they already have under construction the Clinch Valley road, and have their hands full for the present, and will probably make no more in this direction immediately. In the meantime, the land company leaves its proposition open, and it would not be at all surprising if some other line would build in that direction. Be that as it may, these coal people are bent on shipping their coke to the Hanging Rock Iron Region, and the west, and it is safe to say that the facilities will be offered within the next two years, and that the construction will be begun before another year by the N. & W. itself. The route given last week is the most direct, but not the best, and the chances are favorable to a low grade route directly down the Tug Valley from Elkhorn to a connection with the Chattahoo and Slackwater at Louisa. It is a good rule to follow in locating a mountain railroad, to "throw a chip into the water and then follow the chip." The distance by this route would be less than 200 miles from the Flat Top ridge to Ironton; its grades would all be descending with the load, and its empties and east bound freight would nowhere have a grade to exceed 25 feet per mile below Elkhorn. It would pass through a coal field from beginning to end. What more can be asked? A line beginning at tide water, passing through the largest coal field in the United States, then a fine field of gas and domestic coals, both cannel and bituminous, into a region needing this very coke to manufacture its iron, and these very gas and domestic coals themselves for other purposes; a line with practically no grade and fair alignment. Certainly a route so favorable will not long remain unoccupied when prospects for a heavy freight are so flattering from the start."

### They'll All Come Back.

Albert Posey, writing from Omaha, Neb., to his father, says: "I wouldn't live in such a God-forsaken country as this, and I am coming home." Al. is thoroughly disgusted with the Go-west-young-man

racket, and thinks there is no place like Kentucky, and no girl like a Kentucky girl, and he is right.—Anderson Co. News.

### A Harris Man's Tribute to Gov. Buckner.

[Stanford Journal.]

We have always had a great admiration for Simon Bolivar Buckner, but the more we read of his acts since becoming Governor the more we like him. His head seems to be entirely level on the pardoning question and if he adheres to the rules he has laid down he will earn the plaudits of every good citizen.

**SIEMMONS' LIVER REGULATOR**  
Is an affection of the Liver, and can be thoroughly cured by that Grand Regulator of the Liver and Biliary Organs,  
**SIEMMONS' LIVER REGULATOR**  
MANUFACTURED BY  
**J. H. KEELIN & CO., Philadelphia, Pa.**

I was afflicted for several years with disordered liver, which resulted in a severe attack of jaundice. I had a good medical attendance as our section affords, who failed utterly to restore me to the enjoyment of my former good health. I then tried the favorite prescription of one of the most renowned physicians of Louisville, Ky., but to no purpose; whereupon I was induced to try **Simmons' Liver Regulator**. I found immediate benefit from its use, and it ultimately restored me to the full enjoyment of health.

A. H. SHIPLEY, Richmond, Ky.

### HEADACHE

Proceeds from a Torpid Liver and Impurities of the Stomach. It can be invariably cured by taking  
**SIEMMONS' LIVER REGULATOR**

Let all who suffer remember that **SICK AND NERVOUS HEADACHES** Can be prevented by taking a dose as soon as their symptoms indicate the coming of an attack.

**\$1.13 WEEKS.**

The POLICE GAZETTE will be mailed securely wrapped, to any address in the United States for three months on receipt of ONE DOLLAR.

Liberal discount allowed to postmasters and clubs. Sample copies mailed free. Address all orders to  
**RICHARD K. FOX,**  
FRANKLIN SQUARE, N. Y.

### Newport News & Miss. Valley Company.

[CHESAPEAKE AND OHIO ROUTE.]

Solid trains East and West and

**Short Line**

to all points in the

**Northwest and Southwest—**

All trains are First-class.

No second-class cars run on the C. & O., and holders of Emigrant tickets ride in first-class cars. Tickets sold to any destination and baggage checked through.

**QUESTIONS TO BE ANSWERED:**

Where are you going?

When are you going?

Where will you start from?

How many are there in your party?

Write to R. A. ANDERSON, Emigrant and Traveling passenger agent, Charleston, W. Va., who will give you the proper answers to the above questions and send you papers showing cost and amount the tickets will cost.

You will save time and money by taking the C. & O. H. W. FULLER, Gen'l Pass. Agt., W. C. WICKAM, Second Vice-Pres.

BIG SANDY NEWS.

THURSDAY, OCTOBER 27th, 1887.

Aug. Snyder went to Catlettsburg Tuesday.

Judge Stewart went to Pikeville yesterday.

Alex. Lackey left Tuesday for Pikeville.

H. C. Sullivan was in Pike county last week.

D. C. Spencer is at Catlettsburg on business.

Frank Clark, of Ashland, was here last week.

W. L. Geiger, of Ashland, was here this week.

W. H. Waldeck was in Catlettsburg this week.

The Louisa Chautauqua Circle is growing rapidly.

A. J. Loar returned Tuesday from a trip to Cincinnati.

A. P. Ferguson has moved into property below town.

Went Berry, of Catlettsburg, spent Sunday in town.

Mr. J. H. Holton and daughter were in town last week.

Con Brady, of Richardson, came down to see us a few days ago.

T. Titus and J. W. Story, of Cincinnati, were in town last week.

Mrs. C. H. Williamson left this morning for her home near Covington.

Judge J. F. Stewart, of Paintsville, was in this place a few days since.

Mrs. Magruder, of Ashland, is in Louisa, teaching a class in painting.

John W. Hughes, of Star Furnace, spent a few days in Louisa this week.

Tau bark is being shipped in large quantities by several parties of this place.

Get ready to move. Mr. B. F. Thomas will begin the survey of the town next week.

Leave your orders for Watches, Clocks and Jewelry with Mr. Brown below post office.

Thursday, November 24th, has been designated by the President as the day for Thanksgiving.

Mr. W. A. Gurley is up Tug in the interest of the new railroad project from Cassville to Pond.

Repairing promptly done and in workmanlike manner on short notice.

The Magons have graded the lot on which their hall stands and are preparing to make numerous other improvements.

Here U. R. I am going to put in a fine line of Watches, Clocks and Jewelry in my room next to post office for Holiday trade.

If you spit up phlegm and are troubled with a hacking cough, use Dr. J. H. McLean's Tar Wine Lung Balm. For sale by Freese & Norris.

The law requiring fines to be paid by work on the county roads instead of by confinement in jail exclusively, has been enforced lately and has resulted in considerable good to roads near town.

Children often need some safe cathartic and tonic to avert approaching sickness or to relieve colic, headache, sick stomach, indigestion, dysentery and the complaints incident to childhood. Let the children take Simmons' Liver Regulator and keep well. It is purely vegetable, not unpleasant to the taste and safe to take alone or in connection with other medicine. The Genuine has our Trade Mark "Z" in red on front of wrapper. J. H. Zedlin & Co., Philadelphia, Pa.

No more disappointments. Mr. Brown will be found in room next to Post office Mondays and Tuesdays.

Wretched, Indeed. Are those whom a confirmed tendency to biliousness, subject to the various and changeable symptoms indicative of liver complaint. Headache, sick headache, constipation, furred tongue, an unpleasant breath, a dull sharp pain in the neighborhood of the affected organ, impurity of the blood and loss of appetite, signify it as one of the most distressing, as it is one of the most common, of ailments. There is, however, a benign operation for the disease and all its unpleasant manifestations. It is the concurrent testimony of the public and the medical profession, that Hostetter's Stomach Bitters is a medicine which achieves results speedily, thoroughly and healthily. Bitters rectifying liver disorder, it invigorates the feeble, cures biliousness and restores the system to its normal condition. Moreover, it is the grand specific for liver and gall.

Mrs. J. E. Stewart is visiting at Paintsville.

J. P. Creighton, of Catlettsburg, was here yesterday.

Now is your time to save up for Holidays, as we are going to have the neatest stock of goods you ever looked at, and so cheap you can't help but buy. GALLUP, The Jeweler.

W. D. Hoy & Co., Wholesale and Retail Druggists of Rome, Ga., says: "We have been using Dr. King's New Discovery Electric Bitters and Electric Bitters for two years. Have never handled remedies that sell as well, or give such universal satisfaction. There have been some wonderful cures effected by these medicines in this city. Several cases of pronounced Consumption have been entirely cured by the use of a few bottles of Dr. King's New Discovery, taken in connection with Electric Bitters. We guarantee them always. For sale at R. F. Vinson's Drug Store."

Work on the lock and dam at this place has been suspended, the money having been exhausted. The works have been put into such good condition that very little damage can be done by high water.

In cases of Fever and ague, the blood is as effectually, though not so dangerously poisoned by the effluvia of the atmosphere as it could be by the deadliest poison. Dr. J. H. McLean's Chills and Fever Cure will eradicate this poison from the system. 50 cents a bottle. For sale by Freese & Norris.

Fred Gallup, of Catlettsburg, was here this week in the interest of his business. Mr. Brown, his jeweler, was so busily engaged at Catlettsburg that he could not come. He will, however, be here next week.

Sick headache, wind on the stomach, biliousness and nausea, are promptly and agreeably banished by Dr. J. H. McLean's Little Liver and Kidney Pills. 25 cents a vial. For sale by Freese & Norris.

Look out for us. We are coming with a fine stock of goods for Holidays. Silver plated ware, knives, forks, spoons, etc., cheaper than ever sold in the United States. GALLUP.

Not a few of the citizens of Louisa have recently become greatly excited over the astounding facts, that several of their friends who had been pronounced incurable and beyond all hope—suffering from that dreaded monster, Consumption—have been completely cured by Dr. King's New Medical Discovery for Consumption, the only remedy that does positively cure all throat and lung diseases, Coughs, Colds, Asthma and Bronchitis. Trial bottles free at R. F. Vinson's Drug Store. Large bottles \$1.

He is the happiest who does the most to make others happy. The inventor of J. Monroe Taylor's Gold Medal Soda must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal cannot fail to make a happy household. Our better halves say she does not fear our ever frowning as long as she can get the genuine J. Monroe Taylor's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our merchants have it. Their depot is 113 Water Street, N. Y.

FOR SALE. The house and lot in Louisa, where Leo Frank lives. The house is in good repair, and contains ten rooms, together with a nicely finished store-room recently used as a jewelry store. All the household furniture is also offered for sale. This desirable property is offered very cheap. For particulars call at the house.

A number of miners are at work in the White House canal coal veins, getting out a large amount of coal, in order that shipping may begin immediately upon the completion of the railroad to the mines. The track is now laid within about a mile of the mines, and will be completed and ready for use about the 15th of November.

Death can't be Cured by local applications, as they can't reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We give One Hundred Dollars for any case of deafness (caused by Catarrh) that we can not cure by taking Hall's Catarrh Cure. Send for circular free. P. J. Cheney & Co., Toledo, O.

Our Daily Bread.

Heavy and sour bread or biscuit has a vast influence through the digestive organs upon the measure of health we enjoy. How important to our present and future usefulness the blessing of good health and a sound constitution are, we can only realize when we have lost them, and when it is too late to repair the damage. Notwithstanding these facts, thousands of persons daily jeopardize not only their health, but their lives, and the health and lives of others, by using articles in the preparation of their food, the purity and healthfulness of which they know nothing. Paternalists may have spells of headache, the children may have lost their appetites or look pale; if so, the true cause is rarely suspected. The weather, the lack of outdoor air, or some other cause, is given, and the unwholesome, poisonous system of adulterated food goes on. Next to the flour, which should be made of good, sound wheat and not ground too fine, the yeast or baking powder, which furnishes the rising properties, is of the greatest importance, and of the two we prefer baking powder, and always use the Royal, as we thereby retain the original properties of the wheat, no fermentation taking place. The action of the Royal Baking Powder upon the dough is simply to swell it and form little cells through every part. These cells are filled with carbonic acid gas, which passes off during the process of baking. The Royal is made from pure grape acid, and it is the action of this acid upon highly carbonized bicarbonate of soda that generates the gas alluded to; and these ingredients are so pure and so perfectly fitted, tested and adapted to each other, that the action is mild and permanent, and is continued during the whole time of baking, and no residue of poisonous ingredients remains to undermine the health, no heavy biscuits, no "sour bread," but if directions are followed every article will be found sweet and wholesome.

EDMOND'S BRANCH. "Uncle" John Hughes died of the flux on the 21st inst., at the age of 76. He leaves an aged widow, several children, and a host of friends to mourn their loss, which beyond a doubt is his eternal gain, as he was praising God in the highest up to within a few minutes of his death. The widow has the heartfelt sympathy of the community.

The funeral of Charley Hampton, who died some time ago, was preached on last Sunday by Rev. Lee Wilson, of W. Va.

Married, on the 20th inst., Melvin Browning to Elizabeth Hodge, Rev. Underwood officiating. COUNTRY GREENHORN.

In Brief, and to the Point. Dyspepsia is dreadful. Disordered liver is misery. Indigestion is a foe to good nature.

The human digestive apparatus is one of the most complicated and wonderful things in existence. It is easily put out of order.

Greasy food, tough food, sloppy food, bad cookery, mental worry, late hours, irregular habits, and many other things which ought not to be, have made the American people a nation of dyspeptics.

But Green's August Flower has done a wonderful work in reforming this bad business and making the American people so healthy that they can enjoy their meals and be happy.

Remember—No happiness without health. But Green's August Flower brings health and happiness to the dyspeptic. Ask your druggist for a bottle. Seventy-five cents.

BIG SANDY VALLEY DISTRICT MEETING. The Executive Committee appointed by the church of Christ at Lost Creek, Wayne county, W. Va., in Sept., 1887, met at the Court House in Louisa, Oct. 12th, 1887. House was called to order by W. D. Peters, S. S. Vinson being absent in consequence of ill health.

By request of the Chairman, Rev. Elijah Petty invoked the blessings of Heaven, after which committee transacted business as follows: Secretary read the minutes of the previous meeting; also a letter from B. F. Clay, General Agent and Evangelist, containing the information that J. M. Downing would commence preaching in the Big Sandy Valley in Jan., 1888. Committee employed Elijah Petty, J. C. Campbell and A. Lunsford to preach in the Big Sandy Valley District the coming year under the direction and control of the Executive Committee. After a pleasant session and many good suggestions from the brethren present, Committee adjourned to meet again at the same place on the 12th day of Nov., 1887. Proceedings to be published as usual. By order of Chairman, S. S. VINSON.

English Spain. Liniment removes all itrad Sore, or Caloused Lumps, and Blennorrhoea from horses, Blood Spavin, Cabs, Sweeney, Siles, Sprains, Sore and Swells, Throat, Coughs, etc. Save \$50 by use of one bottle. Warranted. Sold by Freese & Norris, Drug Store, Louisa.

REPORTS OF GOVERNMENT CHEMISTS.

As to Purity and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances. E. G. LOR, Ph.D."

"It is a scientific fact that the Royal Baking Powder is absolutely pure." H. A. MORT, Ph.D.

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, tartaric acid, or any other injurious substance. HENRY MORTON, Ph.D., President of Stevens Institute of Technology."

"I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome. S. DANA HAYES, State Assayer, Mass."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world.

NOTE.—The above DIAGRAM illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound of each powder was taken, the total leavening power or volume in each can be calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Royal Baking Powder will convince any fair-minded person of these facts.

While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.

BRADFIELD'S FEMALE REGULATOR.

A SPECIFIC FOR WOMAN'S DISEASES.

Painful Suppressed Menstruation or Monthly Sickness.

Accident Insurance at Actual Cash Value. No Claims Due and Unpaid. All just claims paid promptly and in full.

\$5,000 In case of Death by Accident. \$2,500 For Loss of Arm or Leg. \$25 Per Week Indemnity. At a cost of about \$13 Per Year payable either cash down or in Installments. Membership Fee, \$5. Call on or Address L. B. FERGUSON, FIRE AND ACCIDENT INSURANCE AGENT, LOUISA, KY.

IF YOU ARE THINKING OF BUYING A BICYCLE OR TRICYCLE, you will find it to your advantage to Address L. B. FERGUSON, Louisa, Lawrence County, Ky.

YOU can live at home, and make more money at work for us than at any other place in this world. Capital not needed. You are situated free. Both sexes, all ages. Any one can do the work. Large earnings sure from first start. Noisy outfit and terms free. Better not delay, visit us nothing to see your address and get out. You will see we will do so at once. H. BAKER & CO., Portland, Maine.

THE CELEBRATED FRANK B. CONVERSE BANJO. Manufactured by JOHN F. STRATTON, 49 Maiden Lane, New York.

JOHN F. STRATTON, 49 Maiden Lane, New York. Importer and Wholesale Dealer in all kinds of Musical Merchandise. Musical Boxes, Band Instruments, Stratton's Celebrated Russian Gut Violin Strings.

JOHN F. STRATTON, 49 Maiden Lane, New York. Importer and Wholesale Dealer in all kinds of Musical Merchandise. Musical Boxes, Band Instruments, Stratton's Celebrated Russian Gut Violin Strings.

ACCORDIONS. BUCKLE'S ARNICA SALVE. The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale at R. F. Vinson's Drug Store.

Ich, Mange, and Scratches of every kind cured in 30 minutes by Woolf's Saffron Lotion. As sure cure, and perfectly harmless. Warranted by Freese & Norris, Druggists, Louisa.

THE MOORE COUNTY GRIT.

Portable Corn Mills and Millstones.

The Best in the World for making fine table meal; for grinding Corn, Oats, Rye, Barley or any mixed feed. It cuts all fibrous matter below than any known stone or burr. Samples of Meal sent on application. Address N. C. MILLSTONE CO., PRERWOOD, MOORE CO., N. C.

JOHN F. STRATTON'S Patent Harmonium, Duet, Silver Reed, Solo Accordions.

JOHN F. STRATTON, Importer and Wholesale Dealer in Musical Instruments, 40 Maiden Lane, New York. Send for Catalogue. No Accordion as yet. To be found in all Music Stores.

Sellers' Liver Pills.

Act Directly on the Liver. Cures Chills and Fever, Dyspepsia, Sick Headache, Bilious Colic, Constipation, Rheumatism, Piles, Palpitation of the Heart, Dropsy, Tortured Liver, Coated Tongue, Sleeplessness, and all Diseases of the Liver and Stomach. If you do not "feel very well," a single pill at bed-time stimulates the stomach, restores the appetite, imparts vigor to the system. They cure all diseases like magic. Get the right kind. SELLERS' LIVER PILLS. Sold by druggists. "Send for circular. SELLERS' MEDICINE CO., Pittsburgh, Pa."

Commercial College of KY. UNIVERSITY. Cheapest & Best Business College in the World. Highest Honor and Gold Medal over all other Colleges at World's Exposition, 1883. Graduates in General Business Education. 8000 Graduates in Business. 10 Teachers employed. Cost of Full Business Course, including Tuition, Stationery and Board, about \$800. Short Course, 3 Years, Tuition and Stationery, \$200. No Vacation. Enter Now. Graduates Guaranteed Success. For circular, address Edwin W. Smith, President, Lexington, Ky.

DELAND & CO'S CAFFEINATED SODA.

Best in the World.

Dr. H. O. Cease DENTIST, LOUISA, KENTUCKY. Office—Opposite Chittaur Hotel. Having all the improved instruments and many years experience in Dental work, I guarantee satisfaction.

I desire to call SPECIAL Attention to my important points of excellence found only in THE CHAMPION LAMP.

1. Combustion Perfect. 2. It is the only lamp giving the light of 60 Candles. 3. It is the only Argand which has a current of air circulating between the oil well and burner thereby preventing overheating of the Oil and making EXPLOSION IMPOSSIBLE.

4. A SAFETY EXTINGUISHER. 5. It is the only lamp that keeps dry clean on the outside. 6. It is the only lamp which holds a FULL FLAME when the Wick is short, thereby avoiding FILLING DURING THE EVENING.

Made in all forms, Plain or Fancy, Table or Hanging. Send for Illustrated Circular. A. J. WEIDENER, Sole Order of Patent. No. 36 S. Second Street, Philadelphia, Pa.

CINCINNATI TYPE FOUNDRY.

101 Vin. Street. C. WELLS, Treas.

The type on which this paper is printed is from the above Foundry.

**THE OLD-FASHIONED KITCHEN.**  
How dear to my heart are the days of my boyhood! How often I think of the old-fashioned kitchen, with its buttery, the cellar, the big pile of cordwood, and the old chopping-block with the kindling behind it. The old-fashioned kitchen built on in an L. To him to that kitchen I deem it a pleasure. For often at night, when returned from the shop, I found on the table a half-gallon measure filled up to the brim with cold butter-milk pop. How ardent I seized it, there's really no knowing. How quickly I drank it I hardly can tell. Then, with the butter-milk down my chin flowing, in a manner on which I dislike now to dwell, I skipped from that kitchen, that old-fashioned kitchen, that old-fashioned kitchen built on in an L. To him to that kitchen I deem it a pleasure.

**TORPEDO FISH.**  
The electricity in them will knock a man down. How a Savannah Athlete Tried to Pick One Up on a Bet—The Shock Investigated by Scientists—Curious Results Shown.

On the beach of Tybee, the other day, an old fisherman in old-time dress, with a long white beard and a white flannel shirt, met the old fellow's eye.

"You look like a likely heifer," called out the old fisherman, his hands and arms meanwhile falling to the perpendicular and a merry twinkle taking possession of his eyes.

"A likely what?" rather indignantly rejoined the youth.

"A likely heifer—a chap who can lift a heap," was the reply.

"Yes, I am considered pretty strong in the Savannah Athletic Club," was the answer.

"Did you ever lift much fish?" asked the old fellow, throwing a huge netful of tinkers on the dock and looking his companion over with a critical eye.

"I never saw the fish I couldn't lift," replied the fisherman, thrusting his hand into his pocket, from which, after a violent struggle and much invective, he hauled out a very flat, light leather pocket-book, that was closed with a strap and a piece of rope-yarn.

"Where's your fish?" asked the youth.

"Well, I'll tell you. Here's a fish," and he poked among the tinkers and pointed to a large, solid and skate-like fish in the bottom of the dory.

"Let's see it; it's about five foot up to the dock. I'll bet you ten dollars you can't toss the fish up there."

"I don't want to take your money," replied the young man, magnanimously, as a number of spectators drew around. "But if you've got a half a dozen of the fish, string 'em all together and give me something worth doing. I've lifted 500 pounds before breakfast."

"Oh, yes, I've heard tell of you," said the old man, somewhat warmly. "You're the man that ate a piece of rubber hose for breakfast, and didn't find out it wasn't sausage till some body told you. See that thumb-nail?" he asked, holding up a curious stub with a horny growth upon it. "Well, I served prentice once to a box-maker, and used to put in all the serows with that nail, and pull 'em out with my teeth when they broke off. You know me, and I'll stick to it; you can't leave that fish up to the dock, and there's the money."

The Savannah athlete, thus called upon, deposited ten dollars with a well-known gentleman who had joined the party, and went down the ladder into the boat, while the old fisherman climbed up on the dock to watch the feat.

"Stand back there!" shouted the boss tosser, rolling up his sleeves. "This fish might hit you, old man, and knock some of the blow out of you."

"Heave away," responded the man in oil-skins, tipping a wink at the crowd in general.

"Why? What's the matter with you any way?"

"I've had a stroke," whispered the victim. "The moment I stooped to lift it, I felt it coming all over me. It's in our family, but I've got it bad," and here he rubbed his arms and legs.

"It knocked me clean off my feet," he added, "and my limbs felt like sticks. Send—!" and here a roar of laughter broke from the men, and one of them, seizing him by the arms, jerked him to his feet.

"You're all right, my lad; only next time don't go fooling around old Amos. He's a hard nut."

"Here's your money, sonny," said the old man, holding out a bill. "You've earned it."

"What do you mean?" gasped the athlete.

"What do you mean? Why, jest this. You haven't had a shock of paralysis. You tried to lift one of those darned torpedoes. They'll knock a man down if yer gives 'em the chance."

The athlete looked anxiously ahead, took back his money, and left amid the renewed laughter of the crowd.

"He'll have a yarn to tell the Savannah folks," said the perpetrator of the joke, "but I do hate to hear a man blow and thought I'd take him down. Injured? No, sir-ee. He'll feel stiff for an hour or so, but it won't hurt him. I've been struck by them one hundred times, and it's no fun, I can tell yer. It's just like 'em' struck by a mild stroke of lightning. I don't generally touch 'em, but a man gave me one dollar to fetch one in, so I kept it in the boat. They'll shock you right through the net. When I was a-hauling in the tinker seine this morning I knowed I had a shock-fish from the jerking of my arms. The shocks come right up the wet cord, so that sometimes you can't hang on anyhow. I've seen a man who stuck one with an iron harpoon, thinking it a skate, knocked down so quick he didn't know what hit him."

"You remember old Curt, that used to do the chores around here ten years ago? He lived on rum; he'd do any thing for it. Well, Perce Haldon put up a big job on him once. He'd had the jim-jams and he'd sworn off any quantity of times, but always got back again. He was just getting over a spree when Perce came along with a shock fish. Old Curt had never seen one before, so Perce walks up and says: 'Curt, where can I get this fish cleaned?' What's it worth?" says Curt. "Well, half a dollar, I reckon," says Perce. "I'll draw it myself," says the old nigger. "Go ahead," says Perce, and the old man fetched out his big case knife and began, two or three of the boys gathering round. "You ain't so steady as I've seen you, Curt," says Perce, nearly bursting laughing, for as soon as the old man touched the fish his arm shot out, so that the knife flew about three feet. He didn't say any thing, but picked the knife up and jabbed it into the fish again. You'd have thought he was making passes like a sleight-of-hand chap; his hands jerked this way and that, and his sweat rolled down off his face like rain. At last he dropped her, and sat right down on the grass and says: 'Perce, give me something to steady my nerves; I've got 'em again.' Well, old Curt never heard the last of that, and I never saw him drink afterwards."

"What's the use of the shocks? Why, I reckon they kill fish with 'em or drive 'em off."

The latter assumption is probably correct. The electric apparatus of the torpedo fish is its defense, and is certainly a good one. Its electric organs have been compared to the voltaic pile, and consist of two series of layers of hexagonal cells, the intervening spaces between the plates being filled with a trembling, jelly-like substance, so that each cell can be compared to the Leyden jar. Each torpedo carries about 480 of these batteries, the whole being equal in power to about fifteen Leyden jars, making 3,500 quare inches charged to the highest degree. The upper side of the fish is positive, the lower negative, the shocks evidently being entirely at the will of the strange electrician. The torpedo is met with frequently along the Atlantic coast, especially along the Georgia portion of it.

A naturalist once made some interesting experiments, one of which was the application of the telephone to a torpedo, to see if the shock gave an audible sound. Such proved to be the case, a short, low creak accompanying moderate excitement, the discharge lasting about one-fifth of a second. When the fish was greatly excited the creak became a groan, sounding, it was said, like the tonality of m, and occupying four or five seconds. When the attention of scientific men in England was first called to the torpedo fish, Dr. Walsh, F.R.S., amused himself and scientific London with one of these fishes, after a series of experiments at the Ile de Re. The performances took the form of piscatorial saucers, and it became the rage to take a fish shock. Wondrous medicinal virtue was ascribed to it, and the demand for torpedoes brought a rich harvest to fishermen. Their use in medicine, however, was not new. As Dioscorides, the physician of Antony and Cleopatra, is said to have made use of them.

Dr. Walsh's method was to place a living torpedo upon a wet towel; from a plate he suspended two pieces of brass wire by means of silken cord, which served to insulate them. Round the torpedo were eight persons standing on insulated substances. One end of the brass wire was supported by the wet towel, the other end being placed in a basinful of water. The first person had a finger of one hand in this basin and a finger of the other hand in a second basin, also full of water. The second person placed a finger of one hand in this second basin and a finger of the other in a third basin. The third person did the same, and so on until a complete chain was established between the eight persons and nine basins. Into the ninth basin a figure of the brass wire was plunged, while Dr. Walsh applied the other end to the back of the torpedo, thus establishing a complete conducted circle.

At the moment when the experimenter touched the torpedo the eight actors in the experiment felt a sudden shock, similar in all respects to that communicated by the shock of a Leyden jar, only less intense. The torpedo was then placed upon an insulated supporter and communicated to twenty persons similarly placed from forty to fifty shocks in a minute and a half. Each effort made by the fish was accompanied by a depression of the eyes, which were slightly projecting in their natural state, and seemed to be drawn within their orbits, while the other parts of the body remained immovable. If only one of the organs were touched, in place of a strong and sudden shock, only a slight sensation was experienced—a numbness rather than a shock. The same result followed with every experiment tried. The fish was tried with a non-conducting rod, and no shock followed; glass or rod covered with wax produced no effect; touched with metallic wire a violent shock followed. A Boston physician in making experiments with a powerful fish was several times completely floored, and when at a distance of twelve feet he struck a fish with a gig, the shock was so powerful that he could not release his hand.

Quite a number of electric fishes are known, of which the South American gymnotus is undoubtedly the most powerful. It is that they are caught by driving wild mustangs in the water, the fish exhausting their powers upon them, often fatally. The torpedoes are then captured by the natives. In all nine different species are known, three of the curious electricians belonging to the Ry family. One is a saw-fish, another a catfish, called in the Nile country of Egypt "the thunder fish," and the third is the electric tetraodon from Comoro. The latter gives only a faint shock, but strong enough to probably form a protection from various animals.—Savannah Cor. Philadelphia Times.

**THE ART OF TRAVELING.**  
How to Circulate the Globe at a Comparative Small Expense.

Have you ever talked with a man who has traveled around the world and seen every thing from the mouth of the Congo to the Chinese wall? I met one this morning on the west end veranda. He travels all the time, and he told me that he made a point of getting into cities and countries at holiday times, when he could see them at their best. That is why he stays in America in summer. His next stopping place is Persia, then he goes into Egypt, and he will reach China in April, when the fetes are held. I asked him what it cost to live as he did. "It would cost you about \$12 a day to follow in my paths," he answered, "but I do it for \$7.25. Living expenses have averaged me that the past year. I keep a record of every thing, and know to a penny what I spend. I always travel first-class, see all there is to be seen, and I don't think I have the reputation of being niggardly. But I have traveling down to a science. It costs me now about 25 per cent. of what it did when I began. Of course some of the reduction comes from the cheapness of traveling facilities, but a good part of it comes from knowing what I am about."

Traveling is a business, and to do it economically one has to learn it as he has a trade. For example, tipping costs me about one-third what I am paying for another I do not eat. Then I always avoid a table d'hôte. That is another way of paying for more than you want. My biggest meal is my breakfast. If I get a good one I don't care much what I have the rest of the day. I find that most travelers feel the same way. I keep a diary of every thing I do, and I can tell what I did and where I was on any day for twenty years past. I can only speak one language—English, though I have picked up a smattering of French, but I get along with my native tongue. You will find English-speaking people the world over, and I never trouble myself about the language of the country I am going to.—Philadelphia Press.

**PRESERVING THE DEAD.**  
Description of the Methods Employed in Electro-Plating Bodies.

The latest method of preserving the dead, and one which is growing into popular favor, is electro-plating. It is the application of a perfectly even metallic coating to the surface of the body itself by the same process as that which produces an electrolytic plate. The method is, briefly, this: The body is washed with alcohol and sprinkled with fine graphite powder to insure the perfect conduction of electricity. It is then placed in a bath of metallic solution containing a piece of metal to be used; to this is attached the positive pole of a strong battery; the negative pole is applied to the corpse and a fine film of the metal at once begins to cover the body perfectly and evenly. This may be kept up until the coating attains any desired thickness. To this process there would seem to be no valid objection. In effect it transforms the corpse into a beautiful statue—form, feature, and even expression being perfectly preserved. The body, being hermetically sealed within its metal inclosure, merely dries up and assumes the aspect of a mummy. This method obviates many objections which have been urged against cremation, and at the same time meets the wishes of those whose sentiment, if nothing else, inclines them to favor the ordinary way of burial. The feeling of desecration of the human form divine which its removal to a handful of ashes causes to many people is entirely done away with, as no rude hand is laid upon the once-loved form. No change is brought about in appearance except that face and figure are covered with a shining veil, through which the familiar lineaments appear with all their well-remembered characteristics and expression.—Vestern Electrician.

**CURRENT ITEMS.**  
—Side-saddles are slowly going out of fashion in England, and the man-fashion way of riding horses is being adopted by many of the ladies. Side-saddles have been in use since 1388.

—The "penny walk" is a new expedient for killing time. The walker, standing at a street corner, flips up a cent. If it falls "heads" up he starts toward the right, and if it is "tails" the direction is toward the left. At the next corner he flips again.

—Finger bowls made of birch bark was one of the quaint conceits of a dinner party the other night. The guests could not discover why the pretty things did not leak, but that was a secret of the ingenious hostess, and she wouldn't tell.—Boston Herald.

—There are four couples in Killingworth, Conn., who were married in 1837, and three other couples are living in other places who were married in Killingworth in the same year. Twelve of the fourteen individuals are natives of that town. The ceremony in each instance was performed by the same minister.

—Omaha Man—Having a county fair, eh? Illinois, my friend, is the biggest and finest fair ever held in Illinois. Why, I understood the crops in your section had been utterly ruined by the drought. Yes, but the drought was a blessing to the fair managers. Why, sir, the race track is as hard and smooth as marble.—Omaha World.

—A leather strap two inches wide and eighteen long, fastened to a hickory handle two feet long, with a string at the end by which the handle could be fastened to the wrist, was found between the old walls and the waterboards of an old farm house near Monticello, Ga., that is being torn down. It is an old-fashioned slave whip.

—Eight railroads are now being built, all to connect at a place where a town has not yet been even laid off. Big Stone Gap is the name of this remarkable place. It is a great gap in the range of mountains dividing southwest Virginia and eastern Kentucky, and of necessity the railroads building in that direction must cross the mountains at that place.

—These things are kept constantly in view, according to an advertisement, along with the other curiosities, at a Cincinnati dime museum: "Attractions which are not only amusing, but instructive as well. No features of an objectional or immoral nature. Vulgarly on the stage is constantly forbidden." And yet people are said to visit it.

—A police patrol wagon in Baltimore was conveying a passenger to a station house when the rear axle snapped, and the box came down on the pavement with a crash. The passenger was sleeping when the mishap occurred, but it did not wake him. The noise of the crowd that gathered disturbed him, however, so that he yawning and turned over. From then he slept, while the wagon was piled up and the axle temporarily spliced, until it became necessary to tell the judge how he happened to take a drop too much.

**A Woman's Confession.**  
"Do you know, Mary, I once actually contemplated suicide?" "You horrify me, Mrs. Tell me about it." "I was suffering from chronic weakness. I believed myself the most unhappy woman in the world. I looked ten years older than I really was, and I felt twenty. Life seemed to have nothing in it worth living for." "I have experienced all those symptoms myself," said Mary. "I was in the eleventh hour from the commission of a deed which I shudder to think of. A friend advised me to take Dr. Pierce's Favorite Prescription. I did so. In an incredibly short time I felt like a new being. The 'Prescription' cured me, and I owe Dr. Pierce a debt of gratitude which I can never repay."

The man who essayed to "collect his thoughts" did not make a very large deposit at the bank.

I have been having Smith's Beans but a short time, yet I have sold nearly two gross. The people are well pleased with them, and say the beans fully up to all you claim for them. They are undoubtedly one of the best preparations ever offered to the public.

**Offer No. 173.**  
FREE—To Merchants Only: An elegant silver-plated Water Pitcher, frosted glass, and a set of four glass tumblers, valued at \$10.00, to be given to the first merchant who will send in a letter to the publisher of this paper, stating that he has used Smith's Beans, and is well pleased with them. Address at once, R. W. Tansell & Co., 35 State Street, Chicago.

**Manias.** If your little ones contract skin diseases, apply Glean's Sulphur Soap, Hilly's Hair and Whisker Dye, etc. The best. Money just now is like many men who have it—close.—Texas Siftings.
